EDUCATION

Boston University

MS in Applied data Analytics (GPA: 3.9)

Presidency University

B Tech in computer Science and Engineering (Data Science)

Boston, MA

Sep 2025 - Dec 2026

Bengaluru, India

Sep 2020 - Jul 2024

WORK EXPERIENCE

Boston University

Graduate Teaching Assistant - MET CS 688 (Section A1)

- Appointed as Teaching Assistant for MET CS 688, supporting course instruction, student questions, grading/feedback, and faculty coordination for a 35-student Fall 2026 section.

Boston, MA

Sep 2026 - Dec 2026

Boston University

Graduate Research Assistant - Urban Heat Island / CleanCampus Project | [Portfolio](#) | [GitHub](#) | [Live Demo](#)

- Built the **CleanCampus IoT monitoring dashboard** with **Node.js REST APIs**, **PostgreSQL**, **PM2/nginx**, **DigitalOcean** server, and **Leaflet** to ingest live sensor readings and visualize **BU campus heat patterns**.
- Improved field monitoring by modeling **5 core PostgreSQL tables** for sensors, gateways, zones, readings, and alerts, then adding filters, trend charts, alerts, and **CSV export**.
- Presented BU Urban Heat Island/CleanCampus research at BU and ACSP 2026 in Pittsburgh, turning sensor data into clear planning visuals.

Boston, MA

Jan 2026 - Aug 2026

Boston University Housing

Summer/Fall Operations Assistant - **StarRez** / Housing Systems

- Standardized BU Housing operations by building a **DBMS-backed StarRez pipeline** for **room/furniture records**, summer assignments, **check-in/out updates**, and staff task tracking.
- Supported **full-time summer** and fall housing operations across all **BU dorms** by maintaining accurate **StarRez** records, **room readiness** updates, and resident/staff request workflows.

Boston, MA

May 2026 - Present

Power Tech

Data Engineer

- Reduced processing time by 40%** by automating **15+** Python data cleaning/transformation workflows across **3** internal datasets.
- Improved reporting performance by 30%** by optimizing **20+** SQL queries and building **5 Power BI dashboards** for daily operations reporting.
- Processed **10GB+** daily by building **AWS S3/Lambda ETL** pipelines and containerizing **4** apps with **Docker**, cutting deployment time from **2 hours to under 30 minutes**.

Bengaluru, India

Jun 2024 - May 2025

ACADEMIC PROJECTS

• 3D Avatar Reconstruction Pipeline | [GitHub](#)

Reconstructed a personal **3D avatar** from **multi-angle references**, exported optimized **GLB assets**, and integrated them into a **Unity/Blender** runner prototype with **C# movement**, camera follow, and demo videos.

April 2026

• Agentic LLM Web QA System | [GitHub](#)

Built a local **LangGraph/Ollama** web QA system with **researcher**, **evaluator**, and **writer agents** that search the web, **rank JSON evidence**, and return **sourced answers** instead of raw model output.

April 2026

• RL Biped Robot Simulation | [GitHub](#)

Designed a **bird-legged biped** in **Blender**, imported it into **MuJoCo**, and trained walking behavior with **PPO-style reinforcement learning** rewards for balance, stride, and forward motion.

March 2026

• Formula 1 Pit Stop Analytics DBMS | [GitHub](#)

Built a **Formula 1 pit-stop analytics** system with **SQL Server**, **ETL staging**, normalized **OLTP tables**, **star-schema** reporting, and **ML models** for slow pit-stop prediction.

Dec 2025

• Spotify Popularity Analysis | [GitHub](#)

Analyzed **1,000 Spotify tracks** in **R** with **regression**, t-tests, **ANOVA**, and **ggplot** visualizations to identify how audio features, genre, and explicit content relate to **popularity**.

Dec 2025

• Bizzlink Full-Stack Networking App | [GitHub](#)

Built a **full-stack** entrepreneur networking app with **Flutter**, **Node.js/Express**, **MySQL**, **Firebase** image storage, **authentication**, profile search, and connection workflows.

Jan 2024

RESEARCH PAPER

• Pix2Pix-GAN-Based Lung Segmentation for Chest X-Rays | [IEEE](#)

Built a **Pix2Pix-GAN** lung segmentation workflow for chest X-rays to improve medical image preprocessing; authored **IEEE-published** paper.

Sep 2024 - Apr 2025

• LLMs in Reinforcement Learning: Comparative Analysis

Working with a Machine Learning professor to compare **LLM-guided policy shaping** and reward design in **PPO-based** reinforcement learning; manuscript in progress.

Nov 2025 - Present

SKILLS

Languages: Python, SQL, R, JavaScript, Node.js, Java

Data & ML: ETL, Data Modeling, DBMS, Statistical Analysis, Regression, ANOVA, Scikit-learn, PPO, LLMs

Databases: PostgreSQL, SQL Server, MySQL, MongoDB, Redis, Firebase

Cloud & Tools: AWS S3/Lambda, DigitalOcean, Docker, Kubernetes, PM2, nginx, REST APIs, StarRez, Git

Analytics: Power BI, Tableau, Excel, Leaflet, Dashboards, CSV Export, Data Visualization
