EDUCATION

Boston University <i>MS in Applied Data Analytics (GPA: 3.9)</i>	Boston, MA <i>Sep 2025 - Dec 2026</i>
Presidency University <i>B Tech in Computer Science and Engineering (Data Science)</i>	Bengaluru, India <i>Sep 2020 - Jul 2024</i>

WORK EXPERIENCE

Boston University <i>Graduate Teaching Assistant - MET CS 688 (Section A1)</i>	Boston, MA <i>Sep 2026 - Present</i>
Appointed as Teaching Assistant for MET CS 688, supporting course instruction, student questions, grading/feedback, and faculty coordination for a 35-student Fall 2026 section.	

Boston University <i>Graduate Research Assistant - Urban Heat Island / CleanCampus Project</i>	Boston, MA <i>Jan 2026 - Aug 2026</i>
- Built the CleanCampus IoT monitoring dashboard with Node.js REST APIs, PostgreSQL, PM2/nginx, DigitalOcean server, and Leaflet to ingest live sensor readings and visualize BU campus heat patterns. - Modeled 5 core PostgreSQL tables for sensors, gateways, zones, readings, and alerts, then added filters, trend charts, alerts, and CSV export for field monitoring. - Presented BU Urban Heat Island/CleanCampus research at BU and ACSP 2026 in Pittsburgh, turning sensor data into clear planning visuals.	

Boston University Housing <i>Summer/Fall Operations Assistant - StarRez / Housing Systems</i>	Boston, MA <i>May 2026 - Present</i>
- Standardized BU Housing operations by building a DBMS-backed StarRez pipeline for room/furniture records, summer assignments, check-in/out updates, and staff task tracking. - Supported summer/fall housing operations across BU dorms by maintaining accurate StarRez records, room readiness updates, and resident/staff request workflows.	

Power Tech <i>Data Engineer</i>	Bengaluru, India <i>Jun 2024 - May 2025</i>
- Reduced processing time by 40% by automating 15+ Python data cleaning/transformation workflows across 3 internal datasets. - Improved reporting performance by 30% by optimizing 20+ SQL queries and building 5 Power BI dashboards for daily operations reporting. - Processed 10GB+ daily by building AWS S3/Lambda ETL pipelines and containerizing 4 apps with Docker, cutting deployment time from 2 hours to under 30 minutes.	

ACADEMIC PROJECTS

FinGuard Real-Time Fraud Intelligence Platform GitHub	<i>Oct 2026</i>
Built a streaming fraud platform with Redpanda/Kafka, Python producer/consumer services, PostgreSQL, Redis, FastAPI, Streamlit, and Docker to process card transactions and surface high-risk alerts.	
DataPulse AI Self-Healing Data Pipeline GitHub	<i>Oct 2026</i>
Built a data reliability platform with Pandas, PostgreSQL, FastAPI, Streamlit, and Docker to normalize messy CSV feeds, validate schema/types/domains, quarantine failed records, and generate repair suggestions.	
PaperGraph Research Intelligence Engine GitHub	<i>Oct 2026</i>
Built a research intelligence engine with PostgreSQL, FastAPI, Streamlit, and Docker to extract methods, datasets, metrics, and graph relationships from AI/medical imaging papers, including my IEEE paper.	
Agentic LLM Web QA System GitHub	<i>Apr 2026</i>
Built a local LangGraph/Ollama QA system with researcher, evaluator, and writer agents that search the web, rank JSON evidence, and return sourced answers instead of raw model output.	
Formula 1 Pit Stop Analytics DBMS GitHub	<i>Dec 2025</i>
Built a Formula 1 pit-stop analytics system with SQL Server, ETL staging, normalized OLTP tables, star-schema reporting, and ML models for slow pit-stop prediction.	
Bizzlink Full-Stack Networking App GitHub	<i>Jan 2024</i>
Built a full-stack entrepreneur networking app with Flutter, Node.js/Express, MySQL, Firebase image storage, authentication, profile search, and connection workflows.	

RESEARCH PAPER

Pix2Pix-GAN-Based Lung Segmentation for Chest X-Rays IEEE	<i>Sep 2024 - Apr 2025</i>
Built a Pix2Pix-GAN lung segmentation workflow for chest X-rays to improve medical image preprocessing; authored IEEE-published paper.	
LLMs in Reinforcement Learning: Comparative Analysis	<i>Nov 2025 - Present</i>
Working with a Machine Learning professor to compare LLM-guided policy shaping and reward design in PPO-based reinforcement learning; manuscript in progress.	

SKILLS

Languages: Python, SQL, R, JavaScript, Node.js, Java
Data & ML: ETL, Data Modeling, DBMS, Statistical Analysis, Regression, ANOVA, Scikit-learn, PPO, LLMs
Databases: PostgreSQL, SQL Server, MySQL, MongoDB, Redis, Firebase
Cloud & Tools: AWS S3/Lambda, DigitalOcean, Docker, Kubernetes, PM2, nginx, REST APIs, StarRez, Git
Analytics: Power BI, Tableau, Excel, Leaflet, Streamlit, Dashboards, CSV Export, Data Visualization
